WIN THE WAR AGAINST SPAM ONCE AND FOR ALL NOW!

Is your email being infested with an endless amount of unsolicited chain letters, work-at-home schemes, weight loss claims, credit repair offers, prescription drug scams and adult entertainment proposals? It's annoying, time consuming, consumes your mailbox, traps for identity theft and the mysterious viruses that not only are a serious security threat to your computer, but can take down an entire network.

It's the dirtiest "four letter word" in cyberspace and a major concern to everyone on the Internet – SPAM!

Imagine if you could finally gain back control of your email and have the confidence that the Email you read is really for you. What if all of the maintenance, updates, and all of the filtering were already done, so you don't have to? Of course you'll have full control to customize the changes for you and your entire company with a simple to use interface. You've tried other programs, but none seem to do the trick. Imagine if there was finally a solution that actually worked!

SPAM Zapper is a multi-layered SPAM filter and authentication environment, for email security. Originally developed to limit SPAM for customers of ISPs, SPAM Zapper has filtered millions of messages online for individuals and businesses alike. Whether it's SPAM, Viruses, Malware, Trojans, Internet Worms or Spyware, SPAM Zapper has a proven track record in detecting and eliminating these online security threats and has made email a useful and worthwhile tool again.

In addition to its standard features, what makes SPAM Zapper different from all of the other online security tools available is its ability to filter SPAM before it reaches the PC. This improves your security, protects you from unwanted infection and eliminates the potential threat of infection by filtering on your PC. We update our servers every hour, so that you receive the best available protection for your email. Our customized filtering also offers you the best protection available, while also permitting you to customize SPAM Zapper's environment to best suit your needs.

In addition, our email security implementation is unique, partly because we filter and intercept SPAM, Viruses, Spyware, Phishing attacks and other Malware before you retrieve your email. Lastly, all of our protection features are invisible to you, and those that send you email - family, friends, business partners and associates, which means SPAM Zapper offers you protection that is both secure and private.

Take control of your email NOW with SPAM Zapper and win the war against Spam once and for all!

Company Overview

ABS Computer Technology, Inc., developers of The SPAM Zapper, is an internationally marketed security auditing and consulting firm and a recognized leader in network analysis and Internet security. We have been building groundbreaking mail systems for more than 12 years and are experts in HP Open View, Global DNS, Networking and Enterprise Management.

In addition to contributing to the White House's National Strategy to Secure Cyberspace, we sponsor the Pittsburgh InfraGard Member Alliance. We also work with the CAN-SPAM legislation to reduce Spam on an international scale and promote security awareness in the Computer Incident Response Team (as well as other security initiatives). We work with law enforcement to identify and stop Spammers.

- Bastille Linux
- St Paul's United Methodist Church
- Pittsburgh InfraGard Member Alliance
- Yukon Waltz Telephone Company

Testimonials

Our satisfied clients are testament to our proof of performance.

"When our organization began using SPAM Zapper, its implementation was simple and straight forward. Prior to this, we were bombarded with Spam and email delivered viruses numbering in the hundreds per week. Since the switch to SPAM Zapper, these problems stopped immediately. I was expecting a few junk messages to slip through the system every now and then; however, I am thrilled to report that as of today, not a single Spam message or email delivered virus has made it through to a user's mailbox. Another benefit is that we can now publish contact email addresses on our web site without worry. In turn, SPAM Zapper has significantly reduced administration time and trouble tickets, which translates to a noticeable savings in cost and labor. SPAM Zapper's customer support has been excellent, with every question being answered quickly and professionally. I highly recommend SPAM Zapper to anyone that's looking to make the nuisance of Spam a thing of the past."

Kevin Carothers
Manager, Information Systems
St. Paul's UMC

"I must say that after you started filtering our mail for spam and viruses, the number of viruses detected have dropped to zero.

Very, very impressive!"

Wilfred Ras
W.E.B. Aruba N.V.
